

Diego Tamargo

Profile

Final-year Industrial Organization Engineering student with a strong technical background in data analysis and process automation, seeking to apply analytical and project management skills to innovative engineering solutions. Highly interested in the energy sector.

Professional Experience

PMO & AI Department Intern

06/2026 – Present

Ingeniería y Calidad Sostenible (INGECA SL)

- Deployed custom Python scripts and applications to automate corporate workflows and document processing.
- Developed and implemented a corporate AI RAG (Retrieval-Augmented Generation) system for auditing regulatory and compliance frameworks, utilizing BM25 lexical search and Reciprocal Rank Fusion (RRF).
- Integrated Meta's AI Segment Anything Model (SAM) architecture with Geographic Information Systems (GIS) to automate object recognition and feature extraction from orthophoto imagery.

Bilingual AI Trainer

01/2026 – Present

DataAnnotation, Remote

- Conducted quality assurance and coherence analysis on Large Language Model (LLM) outputs to refine and troubleshoot artificial intelligence algorithms.
- Evaluated complex data sets and provided highly structured feedback for AI model training, ensuring consistency and factual accuracy.

Mathematics and Physics Tutor

09/2023 – Present

Freelance

- Mentored students in Mathematics and Physics, breaking down fundamentals into easily understandable methodologies.

Education

Industrial Organization Engineering

09/2023 – 06/2027

University of Oviedo, Gijón, Spain

- BEng programme undertaken in English for three of four courses, one of them corresponding to an Erasmus mobility programme.

Certifications & Professional Development

- **Supply Chain Analytics** – Rutgers, The State University of New Jersey
- **Fundamentals of AI Agents using RAG and LangChain** – IBM

Skills

Programming & Data Analysis: Python, R, Matlab, Excel

Technical Integration: Data Analysis, AI Integration, AI Agent Creation
